

Black-Magic[®] RT Booster

Black-Magic RT Booster is a liquid mixture designed to replenish a depleted component of large tank installations of room temperature black and antiquing solutions. It is designed for products: Black-Magic RT S20, RT S25, RT S26 and Mi-Tique 1791, 1791 LB, 1792, and 1793.

Features & Benefits

Replenishment of room temperature black and antiquing solutions	Large tank operations
---	-----------------------

Operating Conditions

Instructions

A symptom of a bath in need of Black-Magic RT Booster is that after test kit or burette method additions are calculated and made, they seem to have no impact on the depth of color or rate of darkening of the metals. Correct additions can be determined only by laboratory analysis.

Additions of the product should be no more than 1-gallon Black-Magic RT Booster per 100 gallons of bath. Contact a Hubbard-Hall representative for testing.

Waste Disposal

Contact a Hubbard-Hall Aquapure specialist about disposal of this material.
