Quik Dri 1000

Product Code: 2501104
Revised Date: 05/08/2006

Quik Dri 1000

Quik Dri 1000 is a water soluble liquid product developed for use in the final hot water rinse or rinses of a plating cycle or printed circuit line to prevent water spotting, stains or discoloration on nickel plate, chrome plate, copper and high copper alloys.

Quik Dri 1000 is especially useful in preventing stains resulting from chromium or cyanide plating solutions.

Solutions of **Quik Dri 1000** may also be used to retard oxidation of the copper laminate in a printed circuit operation. The retarding of oxidation of the copper laminate is an advantage when boards are being stored for a brief period.

OPERATING CONDITIONS

Concentrations:	1/2 to 1 pint/100 gallons of water.
Temperature:	room to 190f (88c).
Equipment:	polypropylene, polyethylene, pvc stainless steel or coated steel tanks.
Heaters:	stainless steel or quartz.
Control:	prepare a fresh solution every day.

CAUTION

Quik Dri 1000 is an alkaline product and should be handled accordingly. Avoid skin, eye and oral contact. Wear protective clothing, gloves and goggles when handling the product. Flush exposed areas immediately with clean, cold water. Contact a doctor immediately in case of injury.

WASTE DISPOSAL

Rinses containing **QUIK DRI 1000** may be discarded directly to a sewer or settling lagoon. In order to be completely informed on the latest disposal regulations for you area, please contact local authorities.
